EDUCATION

A. P. Shah Institute of Technology (APSIT)

Bachelor of Engineering in Computer Science and Engineering (A.I. & M.L)

Nov 2022 – Jun 2026

Thane, Maharashtra

EXPERIENCE

Team FullStack

Software Development Intern

Jun 2025 – Sep 2025

Remote

- Worked on Eterniq, an AI code assistant web app with browser-based audio-video screen sharing.
- Optimized Docker Image size by 90%, cut build times by 93% via multi-stage builds and dependency pruning.
- Improved web-search functionality of the chatbot reducing response times by 83% using Gemini grounding.

PROJECTS

Beaker | Go

Jun 2025 – Sep 2025

- Built a custom HTTP web server from scratch, implementing TCP socket programming, protocol parsing, and static file serving
- Designed and implemented request handling and routing system, supporting both static content delivery and API endpoints
- Optimized concurrency with threads and workers to manage multiple client connections

Oil Spill Segmentation | Python, Tensorflow, FastAPI

Jan 2026 – Apr 2026

- Trained an end-to-end model for multi-class segmentation using Synthetic Aperture Radar imagery
- Designed augmentation, patching, and imbalance-handling strategies to improve model robustness.
- Evaluated vision transformer architectures like DeepLabV3+, U-Net over multiple encoder backbones
- Performed ablation study over different loss functions and used custom joint loss functions.

Clinic Management System | Python, Django, DRF, React, PostgreSQL

Jan 2025 – Apr 2025

- Built a full-stack dental clinic management platform with role-based dashboards for doctors, admins, and patients.
- Built and integrated patient registration, patient dashboard, appointment booking, complaint tracking, diagnosis, prescriptions, treatments, follow-ups, and billing workflows.
- Implemented secure JWT-based authentication and role-based access control.
- Developed API design, validation, authorization, foreign-key-safe deletion handling, follow-up management, and billing logic.

TECHNICAL SKILLS

Languages: Python, Go, JavaScript, Typescript, Java, HTML, CSS

Databases: PostgreSQL, MongoDB, Redis

Frameworks: Django, React, Flask, FastAPI, Express, Vue, Node.js, Chi

Developer Tools: Git, Github, Docker, Bash, Linux, GCP

EXTRACURRICULAR

APSIT AIML Club | Member & Ambassador

Jul 2024 – May 2026

- Conducted hands-on workshops on various A.I & M.L concepts

Exalt (APSIT TechFest) | Participant

Jan 2023

- Created an light sensing circuit with LDR to control and play the Chrome Dino game, and presented it in a project competition

Nakshatra | Organizer

Apr 2026

- Helped organize a national level hackathon with over a 1,500 participants from all over India
